

Log File Size Not Being Monitored

Technical Note

01/08/2017

1. Summary

Recently a few cases have been reported of the log file size in AxTraxNG version 27.5.4.x not being monitored, which lead to an oversized log file.

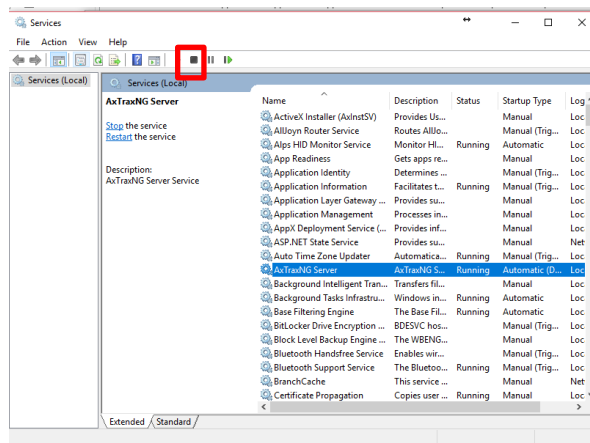

This technical note allows you to resolve this issue.

2. The Workaround Solution

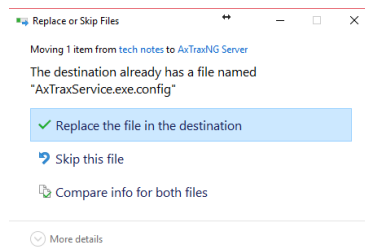

Replace 1 file on the server folder. This file controls the server configuration.

3. How to Apply the Fix

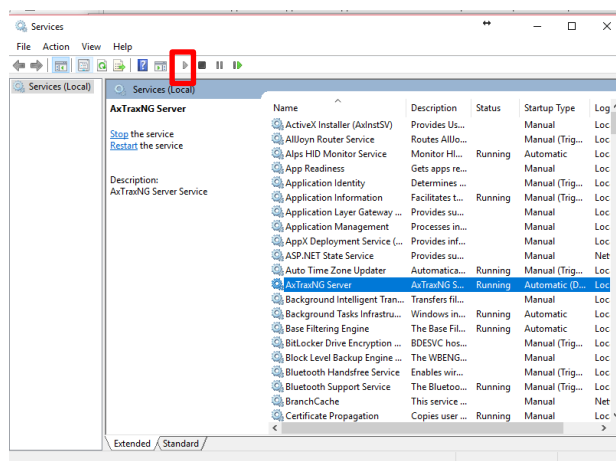

1. Open "Services" on your PC.
2. Select the AxTraxNG server service and click **Stop**:

3. Download the new configuration file from [HERE](#).
4. Go to AxTraxNG server folder (**C:\Program Files (x86)\Rosslare\AxTraxNG Server**) and copy the file into this folder, overwriting the current file in the folder:

5. Go to the root folder (C:\) and delete the current AxTraxNetServer.log file.
6. Go back to the Services screen and select AxTraxNG server services and click start:
